

**Services for serialized
load carriers**

DCE-ID

The Problem

- Are you still recording incoming and outgoing load carriers manually and based on quantities?
- You cannot capture serialized MTV?
- You don't have an overview of the life cycle of your load carriers?
- Do you have automation potential in your material flow?

The Solution

Our DCE-ID scanning system offers you:

- Stationary and mobile scanner solutions for serialized load carriers
- RFID and barcode capture
- Database with the CVs of each load carrier

DCE-ID at a glance

- Android app for all common RFID and barcode scanners
- Recording in the incoming and outgoing goods, defect, repair, inventory, cleaning processes
- Database with the CVs of each load carrier
- Use of the best scanning technology for capturing serial numbers with 1D, 2D barcodes and RFID
- Rights concept for employee groups
- Interfaces to the customer's ERP systems

Our service

ecobyte offers you a solution for real-time transparency with all-round carefree service for your load carriers. Depending on your requirements and use case, the service package includes device(s), a web portal, initial setup and training, ongoing maintenance, software and licenses and data backup. You receive a free replacement service for all devices.

On request, we can serialize your load carrier stock with high-quality label solutions.
