

The Problem

- Do you use paper documents in your supply chains and are currently unable or unwilling to digitize this process?
- Are you chasing the receipts for a long time?
- Do receipts often get lost?

The Solution

Digital transmission of proof of delivery

- Maximum efficiency in the area of your goods logistics by saving long processing times for paper-based processes
- Uncomplicated and encrypted transfer of paper-based receipts from any mobile device
- Direct data forwarding, without intermediate storage on the smartphone

p2d at a glance

- No changes to established processes
- Receipts are not saved
- Easy sharing
- No app installation
- 7 available languages
- Receipt immediately in the customer portal

Instruction

1. Focus on the QR-Code
2. Allow camera access
3. Choose language
4. Take a picture of the receipt
5. Click send
